The IEEE ISSPIT 2007 is the seventh in a series of international symposia that aims to cover most of the aspects in the fields of signal processing and information technology. Sessions will include tutorials in addition to presentations on new research results. Papers describing original work are invited in any of the areas listed below. Accepted papers will be published in the Proceedings of IEEE ISSPIT 2007 and will be available via IEEE Xplore. Acceptance will be based on quality, relevance, and originality. Contest for Best Paper Award will be held and award will be given.

Papers are invited in the following topics:

- Signal Processing Theory and Methods
- Signal Processing for Communications
- DSP architectures and implementation
- DSP for space applications / highly available architectures
- Image and Multidimensional Signal Processing
- Multimedia Signal Processing
- Image and Biological Image and signal processing
- Audio and Electro Acoustics
- Sensor Arrays
- Radar Signal Processing
- Internet Software Architectures
- Multimedia and Image Based Systems
- Mobile Computing and Applications
- E-Commerce
- Bioinformatics and bioengineering
- Information Processing
- Geographical Information Systems
- Object Based Software Engineering
- Speech Processing
- Computer Networks
- Neural Networks

Prospective authors are invited to submit full-length, six-page papers in two-column formats including diagrams and references. Authors can submit their papers as PDF files through the online submission system found on the ISSPIT website: www.isspit.org. The title page should include author(s) name(s), affiliation, mailing address, telephone, fax, and e-mail address. The author should indicate one or two of the above categories that best describe the topic of the paper.

Important Dates
Proposals for Tutorials & Special Sessions July 31st 2007
Six-page paper submission July 31st 2007
Notification of acceptance Sept. 15th 2007
Final version paper with registration Nov. 1st 2007
